

Our 5 promises to make sure digital content is accessible

Easy read booklet

Who we are

We are **The Space**. We give artists money to help them make **digital content**.

We also teach artists how to make **digital content**.

Digital content means anything people can watch, listen to or read using **technology**.

Technology means devices like a TV, computer or phone.

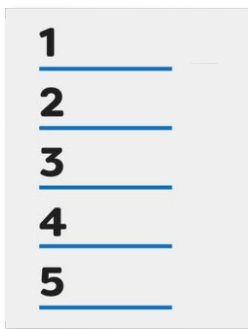

Music, films, dancing, acting, singing and painting can all be digital content.

What this booklet is about

We want to make sure everyone can watch, listen to or read digital content.

This is why we have 5 promises to make sure digital content is **accessible**.

Accessible means it is easy for everyone to use.

We will check our 5 promises every year to make sure we do them and that they are helpful.

Promise 1

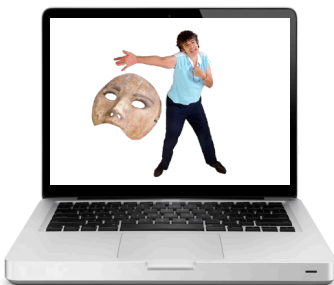

Be innovative

We always try to think of **innovative** ways for more people to watch, listen to or read digital content.

Innovative means new and exciting.

We always think about the different ways someone can watch, listen to or read an artist's digital content.

Promise 2

Give money

We always give artists money to help them make their digital content more accessible.

Artists might use this money to give people information in formats like Easy Read or Braille.

They might use this money to make sure people have what they need to take part in an activity or project.

Promise 3

Help the artists we work with

We want all the artists who work for us to make sure their digital content is accessible.

We ask artists how they will tell people about their digital content and share it in a way everyone can find it.

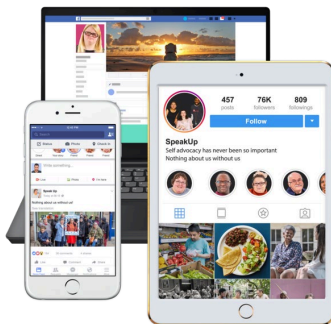

We also ask artists how they will make sure everyone can watch, listen to or read their digital content.

Promise 4

Check our website and social media

We check that our website and **social media** are easy for everyone to use.

Social media means online apps for sharing information and ideas like Instagram and Twitter.

We keep up to date with any new technology that might help people use our website or social media.

Promise 5

Work with other people

We work with people who know lots about how to make digital content accessible. This includes people who are disabled.

They tell us new information about how to make digital content accessible.

They help us understand what different kinds of people need to be able to watch, listen to or read digital content.

Thank you to A2i for the words
